Education

University of Houston Houston, TX
B.S. in Computer Science *May 2028*
Relevant Coursework: Computer Networks, Data Structures & Programming and Databases

Experience

IT Intern Summer 2026
Borusan Pipes *Baytown, Texas*

- Supported cybersecurity initiatives involving vulnerability management, endpoint security, and general IT security operations.
- Supported IT audit preparation by sourcing, organizing, and documenting required technical and compliance evidence.
- Assisted with preparation for a network segmentation transition by supporting efforts to migrate VLANs to Cisco ISE-protected network access controls.
- Resolved and tracked employee IT support requests through Jira, assisting with access, system, and general technical issues.

Extracurriculars

Head of Certification Training CougarCS – Information Security
University of Houston *2026*

- Organize weekly meetings to review topics and prepare students for the certification exam.
- Help organize and coordinate cybersecurity workshops, technical sessions, and awareness events focused on information security fundamentals.

Social Media Officer CougarCS
University of Houston *2026*

- Create and manage social media content to promote cybersecurity events, workshops, and club initiatives.
- Collaborate with team members to increase student engagement and awareness of information security topics.

Projects

RouteWeather | Python In Progress

- Developed a Python application that analyzes full travel routes and detects weather hazards using mapping and weather APIs.
- Implemented sampling at 30-mile intervals to identify rain, snow, ice, and storm risks beyond destination-only forecasts while improving API call efficiency.

Content Tracker | C++ Apr 2025

- Built a C++ command-line application to track movies and TV shows using structured data storage.
- Debugged application logic and validated functionality through test scenarios.

Workshops & Certifications

Security+ Exam in October
CompTIA *2026*

- Preparing for the CompTIA Security+ certification with focus on threats, vulnerabilities, security architecture, security operations, and risk management.
- Building knowledge in network security, identity and access management, encryption, incident response, and vulnerability management through hands-on practice.

Technical Skills

Languages: C++, Python, HTML/CSS
IT Tools: Jira, Trellix ePO, Nessus Scanner, Git, GitHub, VS Code, Linux CLI
IT & Security Concepts: Vulnerability Management, Endpoint Security, Asset Management, COBIT Framework, IT Auditing
Core CS Concepts: Data Structures & Algorithms, Object-Oriented Programming
Office: Microsoft Word, Excel, PowerPoint
