Sriram Maramganti

945-527-1293 | sriram.maramganti1@gmail.com | github.com/srirammaramganti | US Citizen

Summary

Aspiring IT Intern with foundations in CS and cybersecurity. Skilled in C++, Python, and cryptography fundamentals; interested in fields of IT and/or Data Science to learn and develop.

Education

University of Houston — Houston, TX
B.S. in Computer Science, Minor in Mathematics — *Expected May 2028*

Extracurriculars

Head of Certification Training — CougarCS - Information Security
University of Houston — *2026*

- Organize weekly meetings to go over topics to prepare for the certification test
- Help organize and coordinate cybersecurity workshops, technical sessions, and awareness events focused on Information Security fundamentals

Projects

RouteWeather — Python — In Progress

- Developed a Python application that analyzes full travel routes and detects weather hazards using mapping and weather APIs.
- Implemented a 30 mile interval-based sampling to identify rain, snow, ice, and storm risks beyond destination-only forecasts and to also process the API calls more efficiently.

Content Tracker — C++ — Apr 2025

- Built a C++ command-line application to track movies and TV shows using structured data storage.
- Debugged application logic and validated functionality through test scenarios.

Student Record Manager — C++ — May 2025 – Present

- Designed a CLI application using object-oriented programming to manage student records with CRUD operations.
- Implemented structured menus and basic access-control logic for secure user interaction.

Workshops & Certifications

Junior Cybersecurity Analyst Career Path — Remote
Cisco — *Present*

- Studied cybersecurity fundamentals including threats, vulnerabilities, exploits, and risk management concepts.
- Gained hands-on exposure to networking fundamentals, packet flow, and traffic inspection.

GenerationTech Program — Plano, TX
JPMorgan Chase — *2023*

- Collaborated on technology solutions aligned with UN Sustainable Development Goals under mentorship.

Caesar Cipher Workshop — Python — Plano, TX
JPMorgan Chase — *2023*

- Implemented encryption and decryption logic to demonstrate foundational cryptography concepts.

Technical Skills

Languages: Python, C++, HTML/CSS
Developer Tools: Git, VS Code, Linux CLI
Core Concepts: Object-Oriented Programming, Data Structures
Office: Proficient in MS Word, Excel and Power Point
