Summary

Computer Science student at the University of Houston interested in pursuing a career in cybersecurity. Eager to explore security operations, identity and access management, and technology risk, with a particular interest in how organizations detect threats and protect access to their systems.

Education

University of Houston Houston, TX
B.S. in Computer Science | GPA: 3.37 *May 2028*
Relevant Coursework: Computer Networks, Data Structures & Programming, Databases

Certifications

CompTIA Security+ | SY0-701 2026

Experience

IT Technician October 2026 – Present
Borusan Pipe USA *Baytown, TX*

- Support IT and cybersecurity operations by troubleshooting endpoint, account access, software, and workstation-related issues across the organization.
- Configure and maintain employee endpoints while supporting secure system configurations, access controls, software updates, and device readiness.
- Assist with endpoint security and asset management activities while tracking technical and security-related incidents through Jira.
- Support security operations by assisting with endpoint monitoring, system hardening, vulnerability remediation, and maintaining secure IT assets.

IT Intern Summer 2026
Borusan Pipe USA *Baytown, TX*

- Supported cybersecurity initiatives involving vulnerability management, endpoint security, asset management, and IT security operations across a manufacturing environment.
- Assisted with network segmentation by supporting the migration of VLANs to Cisco ISE-protected network access controls across the manufacturing environment.
- Prepared and organized technical and compliance evidence across multiple control areas to support IT audit readiness and documentation efforts.
- Supported vulnerability management activities by assisting with Nessus scanning, reviewing identified vulnerabilities, and helping track remediation efforts.

Projects

Linux Kernel-Level Intrusion Prevention System | Python, nftables, Flask, Raspberry Pi October 2026 – Present

- Developing a Raspberry Pi-based IPS using Linux Netfilter/nftables to filter routed network traffic and drop unauthorized or invalid packets before they reach a protected laptop.
- Implementing packet analysis using Python and connection tracking with conntrack to identify suspicious TCP connection attempts and port scan patterns, triggering temporary IP blocks enforced by the Linux kernel.
- Building a Flask dashboard to visualize network activity, blocked packets, and security events while logging packet metadata and filtering decisions for analysis.

Cybersecurity Home Lab | Virtualization, Windows, Linux In Progress

- Configuring a personal cybersecurity home lab to support virtualization and create isolated environments for hands-on technical practice.
- Building Windows and Linux virtual machines to practice system hardening, user and permission management, network configuration, and security testing in an isolated lab.
- Preparing the lab for future practice with Windows and Linux system administration, networking, security tools, and cybersecurity concepts.

Extracurriculars/Leadership

Social Media Officer CougarCS
University of Houston *2026*

- Create and manage social media content promoting 20+ events, workshops, and student organization initiatives throughout the academic year.
- Collaborate with a team of 20+ officers to increase student engagement in computer science programs, workshops, and technical opportunities.

Head of Certification Training CougarCS – Information Security
University of Houston *2026*

- Lead weekly certification training sessions for 25+ students, reviewing cybersecurity concepts and preparing members for industry certification exams.
- Coordinate cybersecurity workshops, technical sessions, and awareness events reaching 25+ students and covering foundational information security topics.

Technical Skills

Languages: C++, Python
Frameworks & Libraries: Flask, Scapy
IT Tools: Jira, Trellix ePO, Nessus Scanner, Git, GitHub, VS Code, Linux CLI
IT Concepts: Network Traffic Analysis, TCP/IP, DNS, Vulnerability Management, Endpoint Security, Asset Management, Network Segmentation, COBIT Framework, IT Auditing
